

Bamboo Airways Chooses PPS Flight Planning from AIR SUPPORT to Reduce Costs and Boost Efficiency

Billund, Denmark / Hanoi, Vietnam – October 2025: Bamboo Airways has chosen PPS Flight Planning from AIR SUPPORT to optimize operations, streamline workflows, and reduce costs as part of the airline's restructuring and long-term strategy.

The decision was driven by PPS Flight Planning's competitive pricing, seamless system integrations, and pre-set input options that reduce dispatcher workload and minimize human error. With these advantages, Bamboo Airways gains a flight planning solution perfectly aligned with its fleet size and operational requirements.

"PPS is a cost-effective solution that aligns well with the operational scale of Bamboo Airways. The system integrates seamlessly with essential platforms such as aeronautical charts, flight schedules, and crew rostering, enabling data synchronization and enhancing overall operational efficiency. We believe that the adoption of PPS will continue to contribute positively to Bamboo Airways' goal of achieving sustainable growth and operational excellence in the next development phase," says Bamboo Airways.

With PPS Flight Planning, flight documents are now automatically uploaded into the CrewBriefing system, ensuring that pilots can always access the latest version. The system also auto-imports flights directly from the airline's scheduling system, including crew assignments, significantly streamlining pre-flight preparation.

"We are proud to welcome Bamboo Airways to the PPS Flight Planning community," says John Tan, Sales Manager at AIR SUPPORT. *"Their focus on cost efficiency and operational streamlining aligns perfectly with the strengths of PPS Flight Planning. With its broad integration capabilities and intuitive setup, PPS helps reduce dispatchers' workload and ensures seamless data exchange across systems. We look forward to contributing to Bamboo Airways' future growth."*

About Bamboo Airways

Bamboo Airways is a Vietnamese carrier headquartered in Hanoi. Established in 2017, the airline operates domestic and international flights with a growing fleet, focusing on providing exceptional service quality and operational efficiency.

About AIR SUPPORT

AIR SUPPORT is a global flight planning, crew briefing, and flight tracking software provider for airlines, aviation businesses, and government flight operators worldwide.
