

PPS Flight Planning from AIR SUPPORT Has Been Selected by First ACMI Provider in Thailand, Thai SmartLynx

Billund, Denmark / Bangkok, Thailand - September 2025: PPS Flight Planning has been selected by Thai SmartLynx to enhance operational efficiency and support future growth.

The decision was driven by PPS Flight Planning's fast implementation, straightforward configuration, and extensive library of generic aircraft performance data. These capabilities allow the airline to begin using the system quickly while ensuring flexibility for evolving operational requirements.

Welcoming the announcement, John Tan, Sales Manager at AIR SUPPORT, says:

"We are delighted to welcome Thai SmartLynx to our growing community of PPS Flight Planning customers in the Asia region. Due to the flexibility in PPS Flight Planning, ACMI operators can easily implement their clients' flight operation requirement without any hassle in contacting us to make any change request. Our mission is to provide flexible, reliable, and forward-looking solutions that meet each operator's unique needs, and we look forward to supporting Thai SmartLynx in achieving its operational goals."

PPS Flight Planning will support Thai SmartLynx across different stages of its operations, from daily dispatch and route planning to feasibility studies for introducing new aircraft types. The system's versatility ensures it can adapt as Thai SmartLynx expands its network and fleet.

Kampanat Suttisawat from Thai SmartLynx's OCC adds:

"Several key features of PPS influenced our decision to choose it over other providers. Its short lead time for setup allowed us to go live quickly, and the availability of a wide range of selectable generic aircraft performance data was highly valuable. Additionally, as ACMI provider, the flexibility in configuring flight plan formats provided the adaptability we needed to suit our clients' operational preferences."

About Thai SmartLynx

Thai SmartLynx specialises in ACMI and charter services, providing flexible and cost-effective solutions tailored to the evolving needs of airlines. A partner of Avia Solutions Group, the world's largest ACMI provider, Thai SmartLynx focuses on delivering high-quality, scalable leasing options while supporting local and regional airlines in navigating fluctuating market demands. By offering innovative and reliable services, Thai SmartLynx plays a vital role in strengthening the aviation sector in Thailand and globally, contributing to the industry's long-term success.
