

Press Release

“We wanted a dynamic flight planning system...”

Sunlight Air Selects PPS Flight Planning Software to Enhance Operational Efficiency

Billund, Denmark – June 4th, 2024 – AIR SUPPORT, a global flight planning software solutions provider, is pleased to announce that Sunlight Air has selected AIR SUPPORT's PPS Flight Planning software to optimize its flight operations.

“We wanted a dynamic flight planning system like PPS Flight Planning software,” said Roehl A. Brillantes, Manager – Operations Control Center, Sunlight Air, when asked about what specific challenges they are facing in their operation.

Sunlight Air, founded in July 2019, is a prominent ATR operator flying domestic routes in the Philippines. They are committed to delivering exceptional service and operational excellence and have chosen PPS Flight Planning to support their expanding operations. This strategic decision underscores Sunlight Air's

dedication to adopting advanced technology to streamline its processes, enhance flight efficiency, and ensure the highest safety and reliability standards.

Roehl A. Brillantes continues, "We initially learned about the flight planning software from former colleagues who are now working at another airline. Over time, we expect to generate fuel savings and enhance operational efficiency by using PPS Flight Planning software. Choosing PPS Flight Planning was a smooth process."

The PPS Flight Planning software is known for its user-friendly interface, robust performance, and seamless integration with other operational systems. The solution is designed to meet the needs of modern aviation operations, providing dispatchers and flight planners with the tools necessary to manage by exception and optimize complex flight planning requirements efficiently.

Roehl A. Brillantes, OCC Manager of Sunlight Air, stated, "We are thrilled to partner with AIR SUPPORT and implement their PPS Flight Planning software. This collaboration is a significant step towards enhancing our operational capabilities and delivering superior service to our passengers. We are confident that this technology will support our growth and help us achieve new milestones in operational efficiency."

John Tan, Sales Manager of the APAC area at AIR SUPPORT, commented, "We are honored to be chosen by Sunlight Air as their flight planning solution provider. Our PPS Flight Planning software is designed to support Sunlight Air's flight operation particularly in the area for short and complex multi-leg Flights. With the use of our Mobile CrewBriefing application is included with each PPS subscription, flight crew are able to get the latest and concise Flight Briefing Package (including the latest weather and NOTAM) which enhances the safety and efficiency of each flight. In addition, PPS meets the demands of today's aviation industry, and we are committed to supporting Sunlight Air in any of their mission to achieve excellence in flight operations."

Sunlight Air wanted a dynamic flight planning system!

June 2024 | Sunlight Air Selects the PPS Flight Planning Software to Enhance Operational Efficiency.

“We want a dynamic flight planning system like PPS Flight Planning software, which is unlike the generic manufacturer software. Also, we expect to generate fuel savings in daily operations”

- Roehl A. Brillantes, OCC Manager of Sunlight Air.
